Public Comment on Items not on the Agenda

Transparency

-

Could I draw your attention to a perceived Transparency issue when using remote meetings?

When we held in person meetings, the Public could see who else was attending and had the opportunity to speak with the anyone in the room. It was a great networking opportunity to connect with other members of the Public, the airport staff and the FAA.

Now when I sign in as a member of the Public, I have to give my name and email address. Until people are roll called or speak, no member of the Public knows who is attending the remote meeting. However, the Meeting coordinator knows who is attending and how to contact. Transparency for the Meeting Coordinator but not for the members of the Public.

Surely the Public has a right to know who is attending the meeting and of not why not?

Please consider publishing in real time who is:

- attending the meeting
- whom they say they are representing
- how to contact if appropriate.

Thank you

Peter Grace
