Public Comment on Items Item 1 – Approval of Draft Minutes

Could I draw your attention to the huge difference in the three draft minutes? The June 1 minutes note what each member of the Public spoke about. In the prior two minutes presented to be approved today, only the Public's Name was given. This is huge improvement and I hope the start of the inclusion of the Public as participating and contributing members to the Round Table's goal of reducing the noise impact on the communities.

Thank you for taking the time to record what the members of the Public spoke about. I hope where information presented is factually incorrect or misleading in a presentation, the Public's note of the inconsistency will be noted in the Minutes.

Peter Grace
