Subject: Game changing proposal
To: <SFO.GBAS@flysfo.com>, <amontescardenas@smcgov.org>

Hello GBAS team,

I continue to be very concerned about the way the GBAS proposals picked up by SFO are happening arbitrarily. It would be helpful to have a report on a) all the proposals you received, b) why they were accepted c) why they were not accepted, d) how they relate to prior efforts to address noise. And I wonder if an effort was made to look at proposals which the FAA has solicited before?

One of the "game changing" proposals I haven't seen is the Full Length of the Bay solution, brief description [here](#) attached.

The reason that the Full Length of the Bay solution would be a game changing is that the community has long asked **why aren't planes using the full length of the Bay?**

Thank you,

Jennifer
